Management

# **Analysis of economic sectors and professions in Slovak Republic from the point of view of accidents and assessing tools in assessment occupational risks**

**Ing. Alena Ďaďová**

Doc. Ing. Katarína Hollá, PhD.

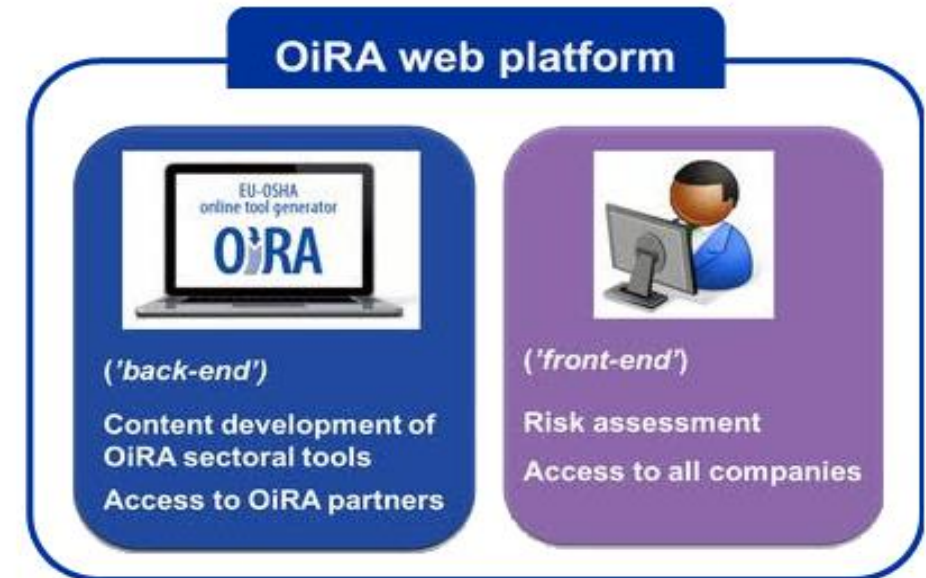

Ing. Samuel Kočkár

# **Lack of occupational risk assessment in enterprises**

- Occupational health and safety is an important both in the European Union and Slovak Republic.
- Registered work accidents are statistically evaluated annually by the National Labour Inspectorate.
- Need to reduce the number of registered occupational accidents.
- Check list, complex method.

# Use and implementation of the OiRA web platform in enterprises

- Online interactive risk assessment – OiRA - designed to assess risks.
- Help companies to correctly assess occupational risks in different areas.
- Slovakia has no Risk assessment tools in OiRA – platform.
- We would like to move more to IRAT initiative – czech IDRIS project
- Project APVV
