

KFV EXPOSURE

INTRODUCTION TO THE EXPOSURE REFERENCE SURVEY

EU SAFETY 2022

VIENNA 23-24.06 2022

CARL NEUMAYR

What is the Exposure survey?

Accident Prevention ➔ Risk-assessment ➔ Probability of a specific outcome as a percentage of all events: Accident
 ➔ Probability of specific consequences as a percentage of the specific outcome: serious injury/death

Statistics about accidents

- IDB (Injury Data Base)
 - Sports
 - Recreation
 - Household
- UDM (Accident Data Management)
 - Traffic

- Continuous statistics
- Long-term studies
- Trends
- Comparable between different fields

Statistics about habits

- Focus
- Comparability:
 - Different fields
 - Long term
 - To the IDB and UDM

- Practicability:
 - Cost-efficient
 - Sustainable
 - Simple

Home/Recreation/Sport

- **20 Sports/Activities**

- Frequency
- Hours/week
- Days/year

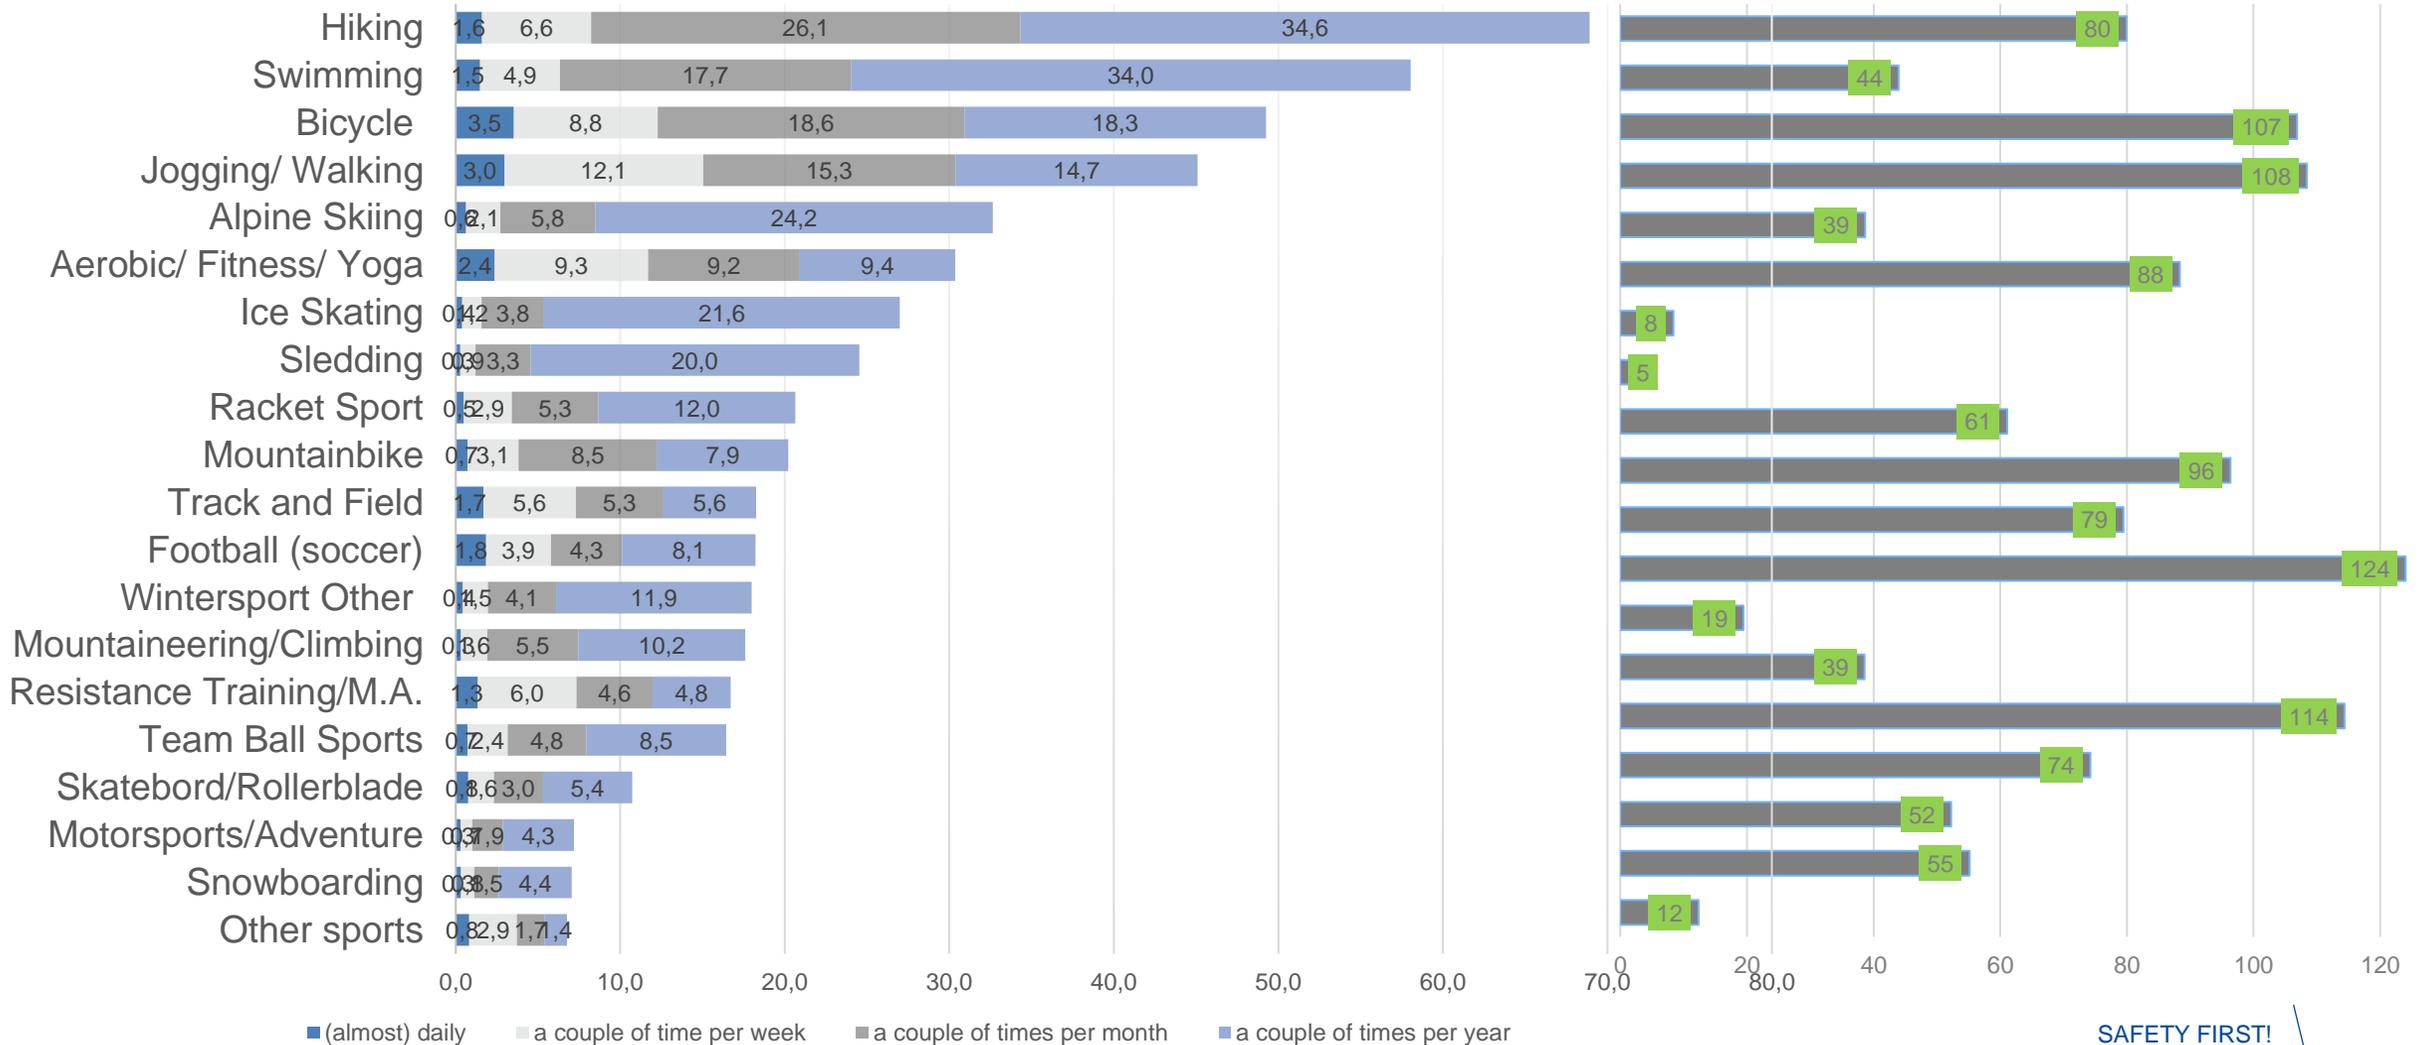

- **Accidents**

- Frequency
- Treatment
- Area

- **Survey**

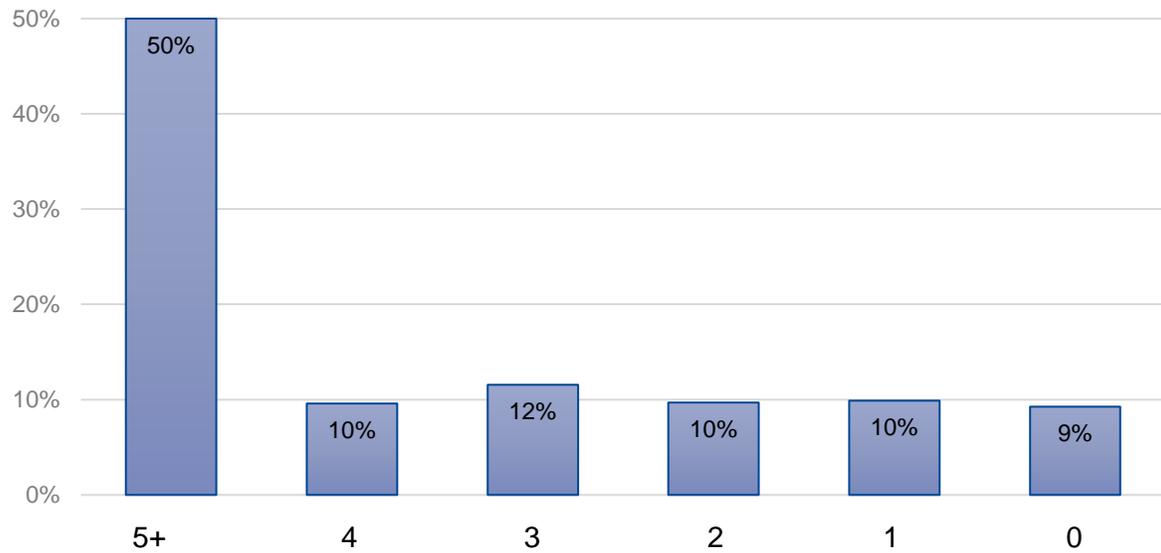

- Representative for Austrian Population (6 years plus)
- started in 2020
- 2 waves per year
- N= 2500
- 40% CATI 60% CAWI

Sport activity: frequency and hours/year

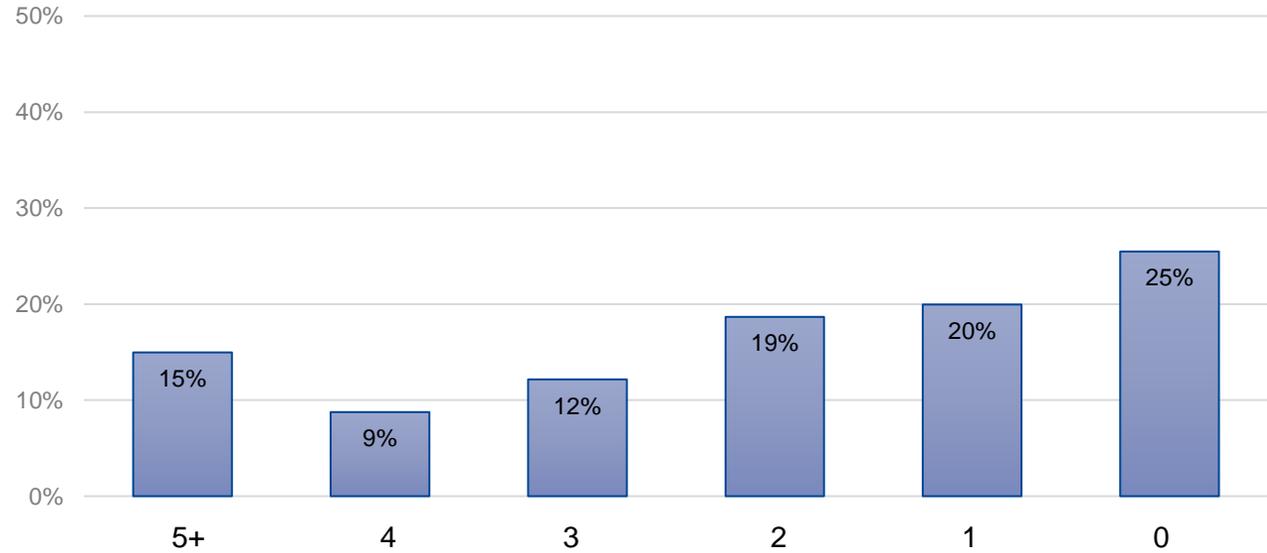

Sport activity: Number of practiced Sports

% of People by number of Sports practiced

% of People by number of Sports practiced regularly

Binary correlations of different sports
